

SWISH

So you want to know what's in the name

Of the Blind Table Tennis type of game?

Played like table tennis in a hall

Using a jingling plastic ball

Whether sighted or blind we play the same.

A bit like Air Hockey but with a small bat

A mini cricket bat, both sides being flat

Then you swish the ball along if able

Rolling down the table tennis table

Fast and furious, no time to chat.

Under the net that is 6 foot tall

Through the hole and hit the back wall

Get it past them, off the back

As you launch your 11 point attack

If you want to take the shot, make the call.

To win a point you must be fast

In order not to come bone last

The blinder will tell you all about

The balls you strike that may be out

Come and try it, have a blast.

And if your serves run into the net

And reach the square, they'll be called a let

The ultimate object of this game

Is to be aggressive and climb to fame

You'll find this game addictive, I bet.

So strike the ball and keep the bat down

React, hit hard and you'll win the crown

There are singles and doubles like on a tennis court

A marvellous adapted and addictive sport

Concentrate as no one can see you frown.

Ray Hannah adapted this fun filled sport

For blinded war vets that could be taught

Its fast, it's dangerous and somewhat furious

The bouncer ball is somewhat curious

We mature at this game like a bottle of port.
